01 January 2026

Dear Valued Customer,

The European Cosmetic Regulation provides the framework for phasing out animal testing in the cosmetic industry. The ban on finished cosmetic products has applied since September 11, 2004, and the ban on ingredients or combinations of ingredients has applied since March 11, 2009.

Calumet Refining LLC is a supplier of raw materials and ingredients that may be used in cosmetic applications. We certify that animal testing has not been initiated or conducted by or on behalf of Calumet or its raw material suppliers after March 11, 2009.

Please contact Calumet's Product Support Team at **technical@clmt.com** with any further questions.

Sincerely,

Lynn Massad
Technical Market Development Manager
