01 January 2026

To Our Valued Customers:

An integral part of our Quality System is maintaining batch identity, integrity, and traceability. To support this, Calumet Refining, LLC implemented a new batch numbering system on **September 1, 2017**.

Batch Number Example: 2510310005

- First two digits: **Year**
- Next two digits: **Month**
- Next two digits: **Day**
- Last four digits: **System-generated sequence number**

In this example, the batch was created on **October 31, 2025**.

This numbering method is applied consistently across all Calumet plants, ensuring **no duplication of batch numbers**. It provides full traceability for all product movements, enabling us to quickly resolve inquiries and minimize concerns.

For further questions, please contact Calumet's Product Support Team at **technical@clmt.com**.

Sincerely,

Lynn Massad
Technical Market Development Manager
