Dear Calumet Customer:

Our organization is committed to ensuring a safe and healthy workplace. We adhere to OSHA regulations to maintain compliance with occupational safety standards. Additionally, we follow the Globally Harmonized System (GHS) guidelines for the classification and labeling of chemicals, promoting a standardized approach to hazard communication. Our commitment includes continuous training, provision of necessary information, and protective measures to our employees, in alignment with both OSHA and GHS requirements.

Calumet Specialty Products Partners, L.P provides our customers with the correct hazard classifications and information on proper handling and safe use of our products through our SDSs and labels. We have updated our safety data sheets and labels to comply with OSHA's new Hazard Communication Standard. OSHA adopted the Globally Harmonized System (GHS) of classification and labeling of chemicals resulting in Hazard Communication Standard (HCS) aligning with GHS.

It is important to note that OSHA regulations may evolve. For the latest changes or updates, visit the official OSHA website.
